Telecommunications infrastructure services provider edotco Group today announced appointment of Ricky Steyn as the new Managing Director of edotco Bangladesh.

Under new leadership, edotco is set to reinforce its commitment and grow its presence in the nation through provision of innovative next generation telecommunication solutions and continued service delivery excellence to its customers, said a press release.

It said this new appointment reaffirms edotco's commitment to playing a significant role in digitally enabling the country towards being 5G ready.

"We are fully committed to partnering the country towards meeting its digital ambitions," said Ricky Steyn.

With over 24 years of telecommunications experience, Ricky specializes in service delivery for both active and passive infrastructure across three different continents. Prior to joining Bangladesh, Ricky was the Director of Engineering in Myanmar for the past four years.

"We have also started tapping into the use of analytics and digitization for a proactive way of managing the business, and the experience he brings from these projects in Myanmar will be invaluable to our dynamic environment here," said Chief Regional Office of Bay of Bengal for edotco Group Vijendran Watson.
